IT'S A SNAP.

Most any one can be an editor. All the editor has got to do is to sit at the desk six days out of the week, four weeks of the month and twelve months of the year, and "edit" such stuff as this:

"Mrs. Jones of Cactus creek let a can opener slip and cut herself in the pantry."

"A mischievous lad of Piketon threw a stone and struck Mr. Pike in the alley last Tuesday."

"John Doe climbed on the roof of his house last week looking for a leak and fell, striking himself on the back porch."

"While Harold Green was escorting Miss Violet Wise from the church social last Saturday evening a savage dog attacked them and bit Mr. Green several times on the public square."

"Isalah Trimmer of Running creek was playing with a cat Friday when it scratched him on the veranda."

"Mr. Frong, while harnessing a broncho last week was kicked just north of the corn crib."

SHIPMENTS LARGE FOR THIS MONTH

The National mine is still pounding away on high-grade milling ore that is being supplied from the mine workings, now under enlarged development. The great production of this mine, with the constant mining of the rich ore, is not only an incentive to other operators but is a convincing and sustaining proof that the National district with its metal-bearing leads is an opportune field and offers as fine opportunities as it did when Workman located the camp and Jack Kendall and S. K. Bradford started their lease operations on Charleston hill some three years ago, and after which they encountered the high-grade.

The camp is looking better, from an actual mining viewpoint than ever before. It has demonstrated its merit on the high-grade line and others are gradually probing the merit of the district in line with less rich bodies of ore throughout the district. The ultimate solution for the less rich ore is a matter of milling facilities and adequate development of the ore bodies, all of which requires big capital. The capital in due time will come to the support of the district and when it does it will show National's future more bright than its \$4,000,000 past.

Last month's shipment was of the old style sort, running into more than \$100,000. So far shipments for this month promise to outclass the July shipment. The shipments during the early part of the week forecast a heavier shipment of bullion for the month of August than

any monthly quota of gold bullion to the mint since March.

The March delivery through the mail to the United States mint was the richest monthly gold shipment with the exception of one in the life of the mine.

TALKS ON MASON VALLEY SUIT.

George E. Gunn, managing director of the Mason Valley Mines company, which is erecting a smelter at Wabuska, wires to New York: "I am glad that the smelter fume question has been raised so early as the outcome is sure to be favorable, as Mason Valley ores contain no arsenic and smelter fumes can not reach Valley anyway. Nevada condemnation laws are very favorable to the smelters, and they would be utilized if necessary."

GOOD ROADS.

Everybody is beginning to realize what a good road, a state thoroughfare, through Nevada would mean. Last winter we prepared a bill providing for such a road, took it to Carson City and secured its introduction, but the legislators were too busy deciding how long a divorcee should pay room rent before receiving her decree to waste time boosting for permanent improvements. Even now it would be more profitable to have the convicts from the state penitentiary building a road from Wells to Winnemucca than to have them making good roads from Reno and Carson City to Lake Tahoe. Money spent on our roads is a profitable investment, and state funds should be used for the building of good roads and substantial bridges.—Carlin Commonwealth.

PIOCHE BONDS ARE DEPOSITED

The complete success of the Pioche merger is assured by the underwriting of \$500,000 of bonds of the Amalgamated Pioche Mines & Smelters corporation. The business arrangements for the absorption of the Nevada-Utah, Ohio-Kentucky and Consolidated Pioche were made several weeks ago and the financing of the merger was all that remained to be done. According to eastern advices this task has been accomplished, the bonds being deposited with a trust company at Paterson, N. J. Energetic work is in progress from No. 1 shaft of the Amalgamated at Pioche. Thirty or forty days may be required to reach the Raymond-Ely Black ledge, after which everything will be plain sailing. The Prince Consolidated of Pioche has two cars of iron ore at the smelter. The American got one and the international the other. This ore will be tried out in the furnaces and the smelting companies will then make their offers for it. There is an enormous amount of iron ore available at the Prince and the outcome of the test is of much importance to the Prince company.

ANTHRAX RAGING.

Frank Compton of Sweetwater, is here on business. He says that an epidemic of anthrax is raging at Bridgeport among stock and a quarantine is being enforced. Wash Brandon lost 16 out of thirty head of milch cows, and others have lost in proportion.—Yerington Times.
